

PERFORMANCE BUILDING PRODUCTS POST-CONSUMER RECYCLED CONTENT BY WEIGHT

*Sensible. Sound.
Solutions.*

Established in 1909, Homasote Company is the “pioneer” of GREEN BUILDING and PACKAGING PRODUCTS in the world; a proud member of the United States Green Building Council (USGBC) and certified by the Forest Stewardship Council (FSC), certificate SGS-COC-005682. Homasote Company is the oldest manufacturer of structural building and packaging products from recycled material in the U.S., the only recycler/manufacturer in the Americas and one of just two manufacturers in the world turning post-consumer waste paper into structural products. Each year approximately 65,000,000 pounds of waste paper – up to 250 tons each workday – are diverted from the waste stream to be recycled into sustainable, environmental Homasote® products. Paper collected curbside from all 53 New Jersey municipalities in two counties is a major source of this post-consumer waste paper. In 1956, Homasote put its manufacturing process into a closed-loop system, recycling all process water, dust, scrap and product rejects, becoming the first of its kind to virtually eliminate its own waste stream.

Homasote® Product	Post-Consumer % by Weight	Homasote® Product	Post-Consumer % by Weight
440 SoundBarrier®	98%	ComfortBase®	98%
DesignWall® 440 (Class C)	98%	4-Way Floor Deck®	98%
